INTRODUCTION
Psoriasis is a disease which has not been defined properly till today. Regarding its causative factors also, there is no clear clinical evidence found. Certain researches have given evidences that Psoriasis may be due to inheritance, whereas some others considered it as an idiopathic disease (unknown cause); While some researches mention it is a psychosomatic disease.

In Twachavikar, Psoriasis is a long lasting Auto-immune disease which is characterized by hyperkeratinized patches. There are five types of Psoriasis viz. Plaque, Guttate, Inverse, Pustular and Erythrodermic which are characterized by itchy covered white scaly lesions. The cause of Psoriasis is not known but it is believed to have a genetic component also. Several other factors are thought to aggravate Psoriasis like stress, physical injury, digestive upset, excessive alcohol consumption and smoking etc. Modern medical science treat patient with Immunosuppressants, corticosteroids and Retinoids etc. but this therapy have serious side effects like Hepatotoxicity and Nephrotoxicity, Osteoporosis, Odema, weight gain etc.

In Ayurveda Psoriasis can be considered under Kustha Vyadhi. Which has two major categories i.e. Mahakushtha and Kshudrakushtha, Psoriasis has more similarity with Ekakushtha which comes under Kshudrakushtha.
AIM
Management of *Ekakushtha* with Ayurvedic treatment – Panchatikta ghrita and Raktamokshan vidhi.

MATERIAL AND METHOD
Various literatures have been collected from classical Ayurvedic texts for the treatment and study of *Ekakushtha*.

Modern medicine books for the study of Psoriasis.
